FOREIGN AND INSULAR.

BRITISH HONDURAS.

Weekly report of conditions and transactions at Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *July 6, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 5, 1902:

Population according to census of 1901, 9,113; present officially estimated population, about 7,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 6. Causes of death: Tetanus, 1; convulsions, 1; gastro-enteritis, 1; apoplexy, 1, and natural causes, 2. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 4, steamship *Managua;* crew, 17; passengers from this port, none; passengers in transit, none; baggage disinfected, none. Steamship *Breakwater;* crew, 34; passengers from this port, 4; passengers in transit, 17; baggage disinfected, 9 pieces. July 5, two-mast schooner *Union*; crew, 7; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

R. H. PETERS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

CHINA.

Report from Hongkong—Improvement in cholera situation.

HONGKONG, CHINA, *June 10, 1902.*

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended June 7, 1902: Four vessels were inspected, 385 individuals were bathed at the disinfecting station, and 471 bundles of clothing and bedding were disinfected by steam.

The cholera situation shows marked improvement in this city, 16 cases and 13 deaths having been reported during this week. This makes a total of 340 cases and 302 deaths thus far this year. Fifty-three cases and 52 deaths from plague were also reported, making a total of 241 cases and 232 deaths thus far this year. No other communicable diseases were reported in the colony during the week.

Reports from Pakhoi indicate that plague has rapidly declined in that city, and compared with last year the epidemic was not severe.

Respectfully,

JOHN W. KERR,
Assistant Surgeon.

The SURGEON-GENERAL.

HONGKONG, CHINA, *June 17, 1902.*

SIR: I have the honor to transmit herewith the abstract of bills of health issued at this station during the week ended June 14, 1902:

Seven vessels were inspected during the week, 383 individuals were bathed, and 411 bundles of clothing and bedding were disinfected by steam. In addition, three steam launches intended for the Philippine customs service were inspected and held to complete fifteen days, as a case of plague occurred among the crews June 6, 1902.

The cholera situation in this city continues to show great improvement, 5 cases and 5 deaths having been reported among the Chinese population. This makes a total thus far this year of 345 cases and 307 deaths. Reports from surrounding cities also indicate that the epidemic has rapidly declined.

The sanitary returns also report 39 cases and 39 deaths from plague, 1 case and 1 death from smallpox, and 1 case and 1 death due to enteric fever. The total plague figures thus far this year are, therefore, 280 cases and 271 deaths.

Respectfully,

JOHN W. KERR,
Assistant Surgeon.

The SURGEON-GENERAL.

Experiments being made at Canton in the treatment of leprosy cases.

DEPARTMENT OF STATE,
Washington, D. C., June 20, 1902.

SIR: I have the honor to inclose herewith for the information of the Public Health and Marine-Hospital Service, copy of a dispatch from the consul of the United States at Canton, China, transmitting a report of Dr. John M. Swan, in charge of the Medical Missionary Society's Hospital, at Canton, in regard to experiments being made there in leprosy cases.

Respectfully,

JOHN HAY,
Secretary of State.

The SECRETARY OF THE TREASURY.

[Inclosure.]

CANTON, CHINA, *April 25, 1902.*

SIR: Medical men at home and abroad will, I have no doubt, take a deep interest in the outcome of the experiments in leprosy cases now being made in Canton by the noted specialist Dr. Adolph Rezlag, of Vienna, Austria.

The following preliminary report thereon has just been made to me by Dr. Swan, of the Canton hospital:

"CANTON, CHINA, *April 25, 1902.*

"SIR: Knowing of your kind and generous interest in the work of this hospital, I beg leave to report to you a few brief facts in connection with an experiment now being made here by Dr. Adolph Rezlag, of Vienna, Austria. Dr. Rezlag came to us highly recommended by physicians of Hongkong, Manila, and other points in the far East, and his standing in the medical profession is unquestionable. He is specially interested in the study and treatment of Asiatic cholera and leprosy, and has applied to us for any aid we could give him to facilitate his work of research in connection with these diseases. In Manila, Sandwich Islands, and elsewhere his great difficulty has been to secure any degree of freedom in the study and treatment of leprosy or cholera, owing to the strict government regulations in connection with such diseases. He has also found it difficult to obtain reliable expert evidence as to the exact results he has accomplished in the treatment of leprosy and cholera.

"After carefully considering the matter and obtaining the approval of our board of hospital managers to lend Dr. Rezlag what aid we could, we have admitted 3 marked cases of leprosy into an isolated room and have given the doctor what aid we

could in providing suitable conditions for the treatment of these cases. Every precaution has been taken against infection from these cases which in twenty-four hours time have begun to show signs of improvement.

"From Dr. Rezlag's intelligent methods of treatment and the enthusiasm he shows in the management of these cases, I am led to believe that gratifying results will in the end be obtained. I may add that one or two physicians will be associated with myself in the observations made in connection with these cases; also that there are no secret or proprietary remedies used or any methods of treatment followed that would be in the least detrimental to the welfare of the patient. Photographs have been taken of the 3 cases now under treatment, and it is expected that a full report will be made of these and other cases that are likely to come under treatment, to a general medical congress which meets a few months hence in Vienna. Later on I shall be pleased to report to you more fully what has actually been accomplished. The self-denying efforts of Dr. Rezlag freely made on behalf of a class of people subject to a living death, are, I think, worthy of admiration and support, and we shall be pleased to further his efforts in any way that we can.

"Respectfully, JOHN M. SWAN,
"*Surgeon in Charge of Medical Missionary Society's Hospital.*

"Hon. ROBERT M. MCWADE,
"*United States Consul, Canton, China.*"

I will make a careful report later on concerning the progress of the result of Dr. Rezlag's experiments.

Respectfully, ROBERT MCWADE,
United States Consul.

The ASSISTANT SECRETARY OF STATE.

COLOMBIA.

Weekly report of conditions and transactions at Bocas del Toro—Fruit port.

BOCAS DEL TORO, COLOMBIA, *July 8, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 7, 1902:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 4. Prevailing diseases, malarial in character. The 4 deaths noted above were among the soldiers, as follows: One from dysentery, 2 from malarial fever, and 1 (soldier's wife) from hæmaturia. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 2, steamship *Mount Vernon;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none. Steamship *John Wilson;* crew, 18; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 6, steamship *Spero;* crew, 19; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, PAUL OSTERHOUT,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

COSTA RICA.

Weekly report of conditions and transactions at Port Limon—Fruit port—One death from yellow fever.

PORT LIMON, COSTA RICA, *July 10, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 10, 1902:

Present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, cases, none; deaths, 1; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 8. Prevailing diseases, yellow fever and malarial fever. The 1 death from yellow fever noted herein, occurred in a hospital here, on July 5, and was brought from the Lent District, about 20 miles from here on the line of the Costa Rica Railway. General sanitary condition of this port and the surrounding country during the week has not been good. Eight deaths occurred in this port during the week, 2 white and 6 colored, due to, respectively, pernicious fever, fiebre amarilla or yellow fever, pulmonary tuberculosis, infantile marasmus, chronic laryngitis, fever and worms, and malarial cachexia.

Bills of health were issued to the following vessels: July 4, steamship *Beverly;* crew, 38; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 5, steamship *Hispania;* crew, 22; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 7, steamship *Athos;* crew, 41; passengers from this port, 9; passengers in transit, 7; baggage disinfected, none. July 8, steamship *Buckman;* crew, 37; passengers from this port, 1; passengers in transit, none; baggage disinfected, none; steamship *Monserrat;* crew, 107; passengers from this port, 40; passengers in transit, 57; baggage disinfected, none. July 9, steamship *Taunton;* crew, 22; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Kitty;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully, WM. H. CARSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Municipality of Port Limon orders hospitals moved outside of city.

[From the Limon Weekly News of June 28 and July 5, 1902.]

"The sixth session took place at 7 p. m. on the 9th instant. There were present, Don Felipe Alvarado, president; Don Carlos Saborio, and Don Francisco Paula Guttierrez. The governor was also present.

"Article 3. The president made a motion that taking into consideration the grave dangers caused by existence in this town of the United Fruit Company, Costa Rica Railroad, and charity hospitals, they be ordered to remove them outside of the town. It was agreed to give to the companies and the corporation mentioned the period of one year to remove these establishments out of the town. The governor was instructed to take the measures necessary according to the opinion of the medical officer to preserve as much as possible the health of the town."

Proposed construction of three hospitals.

[Decree No. 26, June 30, 1902.]

"Considering that the foundation and maintenance of 3 hospitals in the Comarca of Port Limon is of imperious necessity, it is decreed that the decree of June 9, 1899, be reformed in the following terms:

"Article 1. The construction of three hospitals by the executive power will be proceeded with as soon as possible; one for the service of the zone comprehended between Gaupiles and La Junta; another for the zone comprehended between La Junta and the port of Port Limon, and another for the service of the port of Port Limon. The two first will have an isolation ward, and the one for Port Limon will be exclusively for the isolation and treatment of patients suffering with contagious diseases.

"For these constructions the expenses necessary will be met by the funds existing in the public treasury arising from the tax created by the decree already alluded to.

"Art. 2. The buildings once constructed and equipped, the product of the tax will be destined to their maintenance, and the overplus to the building of a general hospital in the port of Port Limon according as may be decreed. In the event of the executive power considering it advisable to undertake as soon as possible the construction of the latter hospital, they are authorized to estimate the approximate cost and appropriate the amount after providing for the maintenance of the three already mentioned hospitals.

"Art. 3. After the foregoing have been provided for, balance will accumulate until a capital of C 100,000 is reached which will remain consolidated in the public treasury.

Current items.

"The death took place on the 27th ultimo at Guapiles of Cifonia Alvarado, it is said from yellow fever, 59 miles from Port Limon.

"Two banana steamers will leave here next week for Charleston, and in future there will be a weekly fruit steamer for that port."

[Sent by Wm. H. Carson, Acting Assistant Surgeon.]

CUBA.

Report from Cienfuegos.

CIENFUEGOS, CUBA, *July 13, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, I have the honor to transmit herewith abstract of bills of health issued during the week ended July 12, 1902.

It will be noted that during the period mentioned 4 bills of health were issued to vessels bound for the United States. None were disinfected. Twenty deaths were reported during the week, giving a mortality of 26.07 per 1,000 per annum. Seven deaths were due to tuberculosis.

Nothing of importance has been reported from the subports of this district.

Respectfully,

G. M. GUITÉRAS,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

Establishment of sanitary board at Havana.

DEPARTMENT OF STATE,
Washington, D. C., June 19, 1902.

SIR: I have the honor to inclose for your information an extract from a recent dispatch from the United States minister to Cuba reporting the establishment of a sanitary board at Havana.

Respectfully,

DAVID J. HILL,
Acting Secretary of State.

The SECRETARY OF THE TREASURY.

[Inclosure.]

HAVANA, CUBA, *June 10, 1902.*

SIR: I am informed by our health officers and American physicians living here, that the state of public health is good. The sanitary condition of the streets, so far as one can see, certainly compares very favorably with some of our American cities.

Dr. Carlos Finlay, for three years a member of the board for diagnosis of infectious diseases, has been appointed chief of the sanitary department of the city of Havana, in the place of Maj. W. C. Gorgas, with Dr. Enrique Barnet, for some time an assistant surgeon in the United States Army, as assistant. The Cuban quarantine board is unchanged, and the national board of health, though projected, has not been constituted.

Drs. Finlay and Barnet are excellent men, and while Cubans, are men of experience and in sympathy with the American systems of sanitation.

Respectfully,

H. G. SQUIERS,
United States Minister.

The SECRETARY OF STATE.

Report from Havana—Government to cease making appropriations for municipal sanitation.

HAVANA, CUBA, *July 16, 1902.*

SIR: I have the honor to submit the following report of the transactions of the Service at this port during the week ended July 12, 1902:

OFFICE.

Number of vessels inspected and issued bills of health	14
Number of crews of outgoing vessels inspected	615
Number of passengers, outgoing vessels, inspected	279
Number of health certificates issued	11
Number of immune certificates issued	80
Number of applications for immune certificates rejected	7

SANATOR.

One cargo vessel completed disinfection, reported last week.	
Number of cargo vessels disinfected during week	9
Number of pieces of baggage and dunnage disinfected	488
Number of passengers and crews (outgoing) inspected	153

SHORE PLANT.

Number of pieces of baggage disinfected	31
Number of pieces of express matter disinfected	15
Number of pieces of baggage inspected and passed	59
Number of pieces of express matter inspected and passed	17
Number of pieces of freight inspected and passed	1,343

I have to report also that at a recent meeting of the cabinet of the Republic of Cuba, it was decreed that on and after August 1, 1902, the Government of Cuba will cease to make appropriations for the disinfection and cleaning of the streets of the various cities and towns of the island, as they consider this a municipal matter, the expense of which

should be borne by the municipalities. For the past three years this expense has been paid by the military government. The cabinet further decided to transfer the disinfection material, etc., now on hand to the various municipalities for which they will reimburse the general Government.

Respectfully, A. H. GLENNAN,
Surgeon.

The SURGEON-GENERAL,

Mortuary report of the city of Havana, Cuba, for the week ended July 12, 1902.

Disease—	Deaths.

Drowning	1
Phosphorus poisoning	1
Total	24

Annual rate of mortality for week, 25.67 per 1,000.

Reports from Nuevitas, Puerto Padre, Gibara, Banes, and Baracoa.

NUEVITAS, CUBA, *July 11, 1902.*

SIR: Through Surg. A. H. Glennan, Havana, I have the honor to submit the following report of this station and subports for the week ended July 5, 1902:

Nuevitas.—Two bills of health were issued to vessels bound for ports in the United States, 17 health certificates issued, 25 pieces of baggage inspected and passed, and 9 pieces disinfected. The weather continues hot and dry. The sanitary condition of the port is good. Two deaths occurred during the week—1 from tuberculosis and 1 from athrepsia.

Puerto Padre.—Sanitary condition of the port, good. No deaths.

Gibara.—Sanitary condition of the port, good. Two deaths from cerebral fever and peritonitis, respectively.

Banes.—Sanitary condition of port, good. Two deaths—1 from tuberculosis and 1 from peritonitis.

Baracoa.—Four deaths—1 from drowning, 2 from enteritis, and 1 from rachitis. The sanitary condition of the port is good.

Respectfully, E. F. MCCONNELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Report of immigrants inspected at the port of Santiago de Cuba from May 1 to May 20, 1902.

Total number of immigrants inspected, 25; number passed, 25.

Respectfully, ALEXANDER B. MCDOWELL,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

EGYPT.

Cholera near Siout (Assiout).

[Cablegram.]

ALEXANDRIA, EGYPT, *July 21, 1902.*

WYMAN: Cholera outbreak Moucha near Assiout.—LONG.

ENGLAND.

Reports from Liverpool.

LIVERPOOL, ENGLAND, *July 1, 1902.*

SIR: I have the honor to state that for the week ended June 28, 1902, there were reported in Liverpool the following cases: Smallpox, 1; typhus fever, 5; enteric fever, 14; scarlet fever, 105; diphtheria, 21, and measles, 61.

For the same period in Birkenhead there were reported 6 cases of scarlet fever, 2 of diphtheria, 6 of enteric fever, 2 of erysipelas, and 26 of measles.

Respectfully, CARROLL FOX,
Assistant Surgeon.

The SURGEON-GENERAL.

LIVERPOOL, ENGLAND, *July 8, 1902.*

SIR: I have the honor to state that for the week ended July 5, 1902, there were reported to the local health authorities the following cases: Smallpox, 3; typhus fever, 3; enteric fever, 11; scarlet fever, 94; diphtheria, 19, and measles, 15.

For the same period there were reported from Birkenhead the following cases: Scarlet fever, 5; enteric fever, 4; erysipelas, 1, and measles, 28.

Respectfully, CARROLL FOX,
Assistant Surgeon.

The SURGEON-GENERAL.

Reports from London.

LONDON, ENGLAND, *July 1, 1902.*

SIR: I have the honor to submit the following report for the week ended June 28, 1902: Five vessels were inspected and given bills of health and 102 members of the crew and cattlemen were vaccinated.

In the 76 great towns of England and Wales there was a total of 31 deaths from smallpox and, of this number, 24 occurred in London during the week ended June 21, 1902. For the same period there were 42 deaths from this disease in Greater London. The admissions during the week were 107 cases against 251, 188, and 157 for the three preceding weeks. There were 822 cases of smallpox under treatment in the hospitals on June 28, 1902. In view of the fact that smallpox is constantly decreasing at this port, I do not consider that it will be necessary to continue the inspection and vaccination after July 15, 1902, and recommend that this work be discontinued from that date. Weekly abstract of bills of health inclosed.

Respectfully, JOHN MCMULLEN,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

LONDON, ENGLAND, *July 7, 1902.*

SIR: I have the honor to report that for the week ended July 5, 1902, there were inspected and given bills of health at this port 10 vessels and 114 members of the crew and cattlemen were vaccinated. On the vessels of the Atlantic Transport Line the vaccination was performed by the ship's surgeon.

During the week ended June 28, 1902, there were 26 deaths from smallpox, and, of this number, 17 occurred in London, 7 less than the preceding week. The admissions during the week were 129 cases against 188, 157, and 107 for the three preceding weeks. Weekly abstract of bills of health inclosed.

Respectfully, JOHN MCMULLEN,
Passed Assistant Surgeon.

The SURGEON-GENERAL.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

BERLIN, GERMANY, *July 3, 1902.*

SIR: I have the honor to transmit the latest information obtained from the imperial health office (Kaiserliches Gesundheitsamt) at Berlin regarding plague and cholera.

Plague.

ITALY.—Two plague cases occurred on the steamship *Duca de Galliera*, coming from Buenos Ayres with 700 passengers, which arrived at Genoa on June 23 The steamship, with all the passengers, was sent to Asinara, in Sardinia.

FRANCE.—On board the steamer *Cambodia*, of the Messageries Maritimes Line, which arrived at Marseille on June 16, a suspicious case of sickness occurred on the voyage from Constantinople. The ship was therefore detained at the quarantine station at Frioul and there disinfected.

EGYPT.—Between June 13 and June 19, inclusive, 4 fresh plague cases and 1 death were registered.

BRITISH EAST INDIA.—In the Bombay Presidency there were registered during the week ended June 6, 674 plague cases and 504 deaths, of which 124 cases and 115 deaths occurred in the city of Bombay.

MADAGASCAR.—During the period from May 19 to June 14, 85 deaths from plague were registered at Majunga.

CAPE COLONY.—Between May 17 and May 24, 2 fresh plague cases were recorded in Port Elizabeth.

QUEENSLAND.—According to the official bulletins there occurred between April 27 and May 10, at Brisbane, 18 plague cases and 6 deaths.

WEST AUSTRALIA.—Up to May 23, 2 fresh plague cases had been reported in Freemantle.

Plague and cholera.

BRITISH INDIA.—In Calcutta, during the week ended May 24, 205 persons died of plague and 55 of cholera.

Cholera.

DUTCH INDIA.—In the district of Soerabaya, between May 4 and May 10, there were registered 254 cases of cholera and 181 deaths.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

Health report from Berlin.

BERLIN, GERMANY, *July 5, 1902.*

SIR: I have the honor to report that the death rate of the city of Berlin for the week ended June 21 was the lowest of any week during the present year, with the exception of the last week of January, viz, 13.7 per 1,000 of the population, as compared with 14.5 per 1,000 during the foregoing week. London, Paris, and Vienna, as well as two-thirds of the large German towns, including Hamburg, Munich, and Dresden, all showed a higher rate of mortality than Berlin. The Charlottenberg and Schöneberg statistics were, however, still more favorable, the death rate of the former being 11.0 and the latter only 9.8 per 1,000 inhabitants. The number of deaths among infants, it is true, indicated a considerable increase, having risen from 3.6 to 4.1 per 1,000, although this rate did not reach even one-half the rate of Chemnitz and Munich. Cases of acute diseases of the intestines were somewhat more frequent, causing 65 deaths. The number of cases of acute diseases of the respiratory organs remained about the same as during the foregoing week, causing 40 deaths. Deaths from consumption were considerably less frequent, their number having decreased in

four weeks from 102 to 69. Measles claimed only 4 victims, one-fourth of the number in the previous week. Eight deaths from scarlet fever were registered. There occurred only 1 death from diphtheria. Twenty three persons died by violence, that number being the largest in any single week since the first week of the new year.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

Bulgarian quarantine measures against plague.

[Clipping from the Berliner Tageblatt.]

BERLIN, GERMANY, *July 3, 1902.*

The Bulgarian Government has, as we are informed by telegraph from Sofia, declared Constantinople, beginning with the day before yesterday, to be infected with plague, and has put in force, until further notice, the following quarantine regulations:

1. Travelers coming from Constantinople to Bulgaria via Burgas, Varna, and Hebitschewo, shall be subjected to a strict medical examination and the disinfection of their baggage. For this purpose such travelers will be detained in quarantine for twenty four hours, and longer if the said examination and disinfection render it necessary. In addition to this, said travelers will be subjected to medical supervision for ten days at the place of destination. Regarding travelers who only pass through Bulgaria, no prescriptions are contained in the ordinance.

2. Ships arriving from Constantinople are only allowed to enter Burgas and Varna, where they obtain free pratique for other Black Sea ports.

3. It is prohibited to import the following articles into Bulgaria: Worn linen and clothing, rugs and similar articles which have been used, rags, even if pressed by hydraulic power and packed in bales, old and used bags, carpets, and embroideries, as well as all fresh animal products such as bones, hoofs, undried and unsalted entrails, raw hides and such like.

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL.

GUATEMALA.

Weekly report of conditions and transactions at Livingston—Fruit port.

LIVINGSTON, GUATEMALA, *July 8, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 8, 1902:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 2. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: July 8, steamship *Condor;* crew, 16; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

GUY A. DARCANTEL,
For A. J. SMITH,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

HAWAIIAN ISLANDS.

Influenza and dysentery during June, 1902.

HONOLULU, H. I., *July 5, 1902.*

SIR: I have the honor to transmit herewith statistics concerning influenza and dysentery in the Hawaiian Islands for the month of June, 1902, namely, influenza, 74; dysentery, 24.

Respectfully,

L. E. COFER,
Passed Assistant Surgeon,
Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL.

Report of immigrants inspected at the port of Honolulu, H. I., during the month of June, 1902.

Total number of immigrants inspected, 1,713; number passed, 1,709; number certified for deportation on account of dangerous contagious or loathsome diseases, or for other physical causes, 4.

L. E. COFER,
Passed Assistant Surgeon,
Chief Quarantine Officer, Hawaii.

The SURGEON-GENERAL.

HONDURAS.

Weekly report of conditions and transactions at La Ceiba—Fruit port.

LA CEIBA, HONDURAS, *July 5, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 5, 1902:

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 2. Prevailing disease, malaria, mild type. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: July 2, steamship *David;* crew, 24; passengers from this port, none; passengers in transit, none; baggage disinsfected, none. July 5, steamship *Geo. Dumois;* crew, 19; passengers from this port, none; passengers in transit, none; baggage disinfected, none; steamship *Gwent;* crew, 16; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

W. B. ROBERTSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Weekly report of conditions and transactions at La Ceiba—Fruit port.

LA CEIBA, HONDURAS, *July 12, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 12, 1902:

Present officially estimated population, about 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 3. Prevailing disease, malaria. General sanitary condition of this port and the surrounding country during the week, good.

Bill of health was issued to the following vessel: July 8, steamship *Usk;* crew, 20; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

W. B. ROBERTSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

Weekly report of conditions and transactions at Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, *July 9, 1902.*

SIR: I have the honor to make the following report of the conditions and transactions at this port during the week ended July 9, 1902:

Population according to census of 1896, 1,856. Present officially estimated population, 2,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing disease, malarial fever. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following vessels: July 3, steamship *Breakwater;* crew, 34; passengers from this port, 9 (2 Belize); passengers in transit, 10; baggage disinfected, 13 pieces. July 4, steamship *Bratten;* crew, 15; passengers from this port, none; passengers in transit, none; baggage disinfected, none. July 5, steamship *España;* crew, 14; passengers from this port, none; passengers in transit, none; baggage disinfected, none.

Respectfully,

S. H. BACKUS,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

MEXICO.

Yellow fever at Coatzacoalcos.

COATZACOALCOS, MEXICO, *June 30, 1902.*

SIR: The sanitary condition of Coatzacoalcos for the week ended June 29, was as follows: New cases of yellow fever, 10, and deaths, 6.

Respectfully,

A. R. STUBBS,
United States Consular Agent.

Hon. W. W. CANADA,
United States Consul, Vera Cruz.

Report from Tampico.

TAMPICO, MEXICO, *July 14, 1902.*

SIR: I have the honor to transmit herewith abstract of the bills of health issued at this port during the week ended July 12, 1902: During the same period there were recorded in the office of the juez civil a total of 9 deaths, due to causes as follows: Malaria, 2; pneumonia, 2; meningitis, 1; gastro-enteritis, 1; intestinal obstruction, 1; cirrhosis of liver, 1; bronchitis, 1. The sanitary condition of the port continues to be satisfactory.

Respectfully,

JOS. GOLDBERGER,
Assistant Surgeon.

The SURGEON-GENERAL.

Report from Vera Cruz—Yellow fever in Alvarado and other places.

VERA CRUZ, MEXICO, *July 7, 1902.*

SIR: I have the honor to make the following report for the week ended July 5: From yellow fever there were reported 7 cases and 8 deaths, and 45 deaths from all causes. No cases or deaths were reported from smallpox. This apparent mortality of 114 per cent is due to the fact that the deaths of one week are as a rule reported as cases in the week previous. Yellow fever is epidemic in Alvarado, a small town 30 miles below here on the coast. I have heard of cases and deaths along the line of the Mexican Railroad between here and Cordoba and in Cordoba, and also at different points on the line of the Vera Cruz and Pacific Railroad. The chances are that many of the adjoining villages and towns are infected. No authentic reports can be obtained from these small towns as there are few medical men in them. The shipping continues free from infection.

Respectfully,

S. H. HODGSON,
Acting Assistant Surgeon.

The SURGEON-GENERAL.

PHILIPPINE ISLANDS.

J. C. PERRY,
Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL.

Cholera in the Philippine Islands.

MANILA, P. I., *June 12, 1902.*

SIR: I have the honor to submit report of the progress of cholera in the Philippine Islands for the weeks ended May 31 and June 7, 1902.

It will be seen that the situation has remained about the same in Manila, and the end is not yet in sight. The disease has about subsided in the Camarines, one of the first provinces affected, and the same is more or less true of the provinces of Bulacan and Pampanga, both of which were affected early and have suffered severely from the disease, some of the pueblos having lost as high as one-tenth of their entire population.

During the past two weeks the provinces of Laguna and Batangas have become badly infected, and many of the towns, especially Calamba, Biñañ, Santa Cruz, and Santa Tomas, have suffered serious epidemics. The disease has also increased in Cavite province, and several of the marines have died, including 1 officer. The disease has also affected the soldiers in Laguna and Batangas provinces, and a number have died.

The disease was introduced into Laguna province from Manila by persons who were allowed to travel up the Pasig River on passes, and by cascoes and their crews, and from this province it spread overland to towns in Batangas province, and it is reported that the disease has been taken by bancas carrying people from Batangas to Calapin, on the adjacent island of Mindoro.

So far, 27 boats have had cases of cholera appear on board while serving the required five days' quarantine, but none have had cases of the disease occur after being allowed to sail, and no port in the islands has been infected by boats from Manila since the epidemic started, except that of Nueva Caceres, which, as already reported, was infected about the same time that the disease appeared in Manila, and Tacloban, which in all probability was infected from Nueva Caceres.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL.

PORTO RICO.

Report from San Juan—Quarantine transactions at ports and subports—Mortality statistics.

SAN JUAN, P. R., *July 7, 1902.*

SIR: I have the honor to forward herewith the following statement of the quarantine transactions at this and the 6 subports of the island of Porto Rico for the month of June, 1902:

San Juan.—Number of vessels inspected, 19; number of bills of health issued, 27; number of vessels held in quarantine, 2; number of pieces of baggage disinfected, 54; number of sacks of mail disinfected, 5; number of persons detained at the quarantine station, none; number of persons vaccinated, 7; number of vessels disinfected, none. On the 17th instant, the French steamship *Saint Simon* arrived from Saint Marc, Gonaives, Petit Goave, Port au Prince, Cape Haitien, and Sanchez. Bills of health presented by this vessel were all clean, and the local passengers were permitted to land. Two sacks of mail from Cape Haitien were disinfected at the quarantine station. The vessel was held in quarantine while here, and transacted all her business under guard. The Spanish steamship *Montevideo*, from Havana. Port Limon, Colon, Barranquilla, Puerto Cabello, and La Guayra, via Ponce, arrived upon the 18th instant; all bills of health clean. Passengers for Porto Rico were allowed to land as immunes. Twelve pieces of baggage and a sack of mail were removed to the island and disinfected. The vessel

was placed in quarantine under guard while she remained in port. The 2 Cuban steamships of the Herrera Line, the *Julia* and the *Maria Herrera*, arrived upon the 19th and 28th, respectively. They were both upon their regular schedule from Cuban and Dominican ports and they had both been disinfected at Santiago de Cuba prior to clearing for this port. The bills of health carried by these steamships were all clean, and they were therefore granted free pratique and passengers permitted to land. One sack of mail from the *Julia* and 1 sack of mail and 42 pieces of baggage from the *Maria Herrera* were removed to the island and there disinfected.

I inclose herein vital statistics of the city of San Juan. The city was officially reported free from smallpox June 30, no cases having occurred since June 15.

The following embraces a report of the vessels inspected at the several subports: Mayaguez, 11; Arecibo, 3; Humacao, 3; Aguadilla, 1; Fajardo, 2; Arroyo, 1.

The following are the mortality statistics from the subports: Mayaguez, 112; Arecibo, 88; Humacao, 28; Aguadilla, 52; Fajardo, 48; Arroyo, 33.

Respectfully, H. S. MATHEWSON,
Passed Assistant Surgeon,
Chief Quarantine Officer for Porto Rico.

The SURGEON GENERAL.

[Inclosure.]

Report from Ponce—Summary of transactions and mortality statistics for the month of June, 1902.

PONCE, P. R., *July 7, 1902.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended July 5, 1902. Also the summary of transactions at this station and report of mortality for the city during the past month of June, 1902. During the week 3 vessels were inspected and passed and 7 bills of health were issued. So far as I have been

able to learn, there has not appeared any quarantinable disease in this district.

Respectfully,

W. W. KING,
Assistant Surgeon.

The SURGEON-GENERAL.

W. W. KING,
Assistant Surgeon.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

FRANCE—*Roubaix.*—Month of June, 1902. Estimated population, 124,660. Total number of deaths, 161, including measles, 13, and 2 from whooping cough.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended June 28, 1902, correspond to an annual rate of 15.1 per 1,000 of the aggregate population, which is estimated at 14,862,909.

Bradford.—Two weeks ended June 28, 1902. Estimated population, 281,770. Total number of deaths, 170, including diphtheria, 3; enteric fever, 1; measles, 18; scarlet fever, 2; whooping cough, 2, and 17 from tuberculosis.

London.—One thousand two hundred and fifty-one deaths were registered during the week, including measles, 44; scarlet fever, 9; diphtheria, 14; whooping cough, 31; enteric fever, 8; smallpox, 17, and diarrhea and dysentery, 16. The deaths from all causes correspond to an annual rate of 14.2 per 1,000. In Greater London 1,694 deaths were registered. In the "outer ring" the deaths included 4 from diphtheria, 2 from measles, 2 from scarlet fever, 9 from smallpox, and 3 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended June 28, 1902, in the 21 principal town districts of Ireland was 19.3 per 1,000 of the population, which is estimated at 1,092,322. The lowest rate was recorded in Lurgan, viz, 4.4, and the highest in Kilkenny, viz, 64.6 per 1,000. In Dublin and suburbs 149 deaths were registered, including enteric fever, 4; measles, 3; scarlet fever, 2, and 26 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended June 28, 1902, correspond to an annual rate of 19.2 per 1,000 of the population, which is estimated at 1,679,923. The lowest mortality was recorded in Leith, viz, 15.9, and the highest in Perth, viz, 29.7 per 1,000. The aggregate number of deaths registered from all causes was 620, including diphtheria, 4; measles, 15; scarlet fever, 4, and 14 from whooping cough.

JAPAN—*Nagasaki.*—Ten days ended June 20, 1902. Estimated population, 131,700. Total number of deaths not reported. No deaths from contagious diseases.

JAVA—*Batavia.*—Two weeks ended June 7, 1902. Estimated population, 150,000. Total number of deaths not reported. No contagious diseases reported.

MALTA.—Two weeks ended June 21, 1902. Estimated population, 189,749. Total number of deaths, 160, including diphtheria, 2, and 2 from enteric fever.

PHILIPPINE ISLANDS—*Manila.*—Month of March, 1902. Estimated population, 223,900. Total number of deaths, 770, including diphtheria, 1; enteric fever, 6; measles, 1; smallpox, 2; plague, 1, and 79 from tuberculosis.

SOUTH EAST AFRICA—*Lourenço Marquez.*—Month of May, 1902. Estimated population, 7,000. Total number of deaths, 46, including 3 from phthisis pulmonalis.

SPAIN—*Barcelona*—Two weeks ended July 7, 1902. Estimated population, 672,000. Total number of deaths not reported. Ten deaths from enteric fever and 5 from smallpox reported.

Corunna.—Month of June, 1902. Estimated population, 44,000. Total number of deaths, 99, including enteric fever, 2, and 27 from tuberculosis.

Malaga.—Month of May, 1902. Estimated population, 130,109. Total number of deaths, 440, including enteric fever, 4, and 8 from smallpox.

Valencia.—Two weeks ended June 30, 1902. Estimated population, 204,000. Total number of deaths, 257, including 6 from enteric fever.

Vigo.—Month of June, 1902. Estimated population, 22,000. Total number of deaths, 29, including enteric fever, 1, and 1 from typhus fever.

Cholera, yellow fever, plague, and smallpox, June 28, 1902, to July 25, 1902.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from United States consuls through the Department of State and other sources.]
